Relief Road: Wealden Fights Back!

We the undersigned strongly object to the Secretary of State imposing a requirement that our District and County Councils “will take the necessary steps to ensure that essential infrastructure is put in place” to support the East Grinstead development, because it would lead to an unacceptable increase in traffic into our district, a quantum of development that would be unsustainable and would have significant adverse environmental impact upon areas of both national and international standing.

IMPORTANT: DO NOT sign this as well as the A4 petition in public locations.
We must not have duplicate signatures.
